Smart Water Management...Simplified

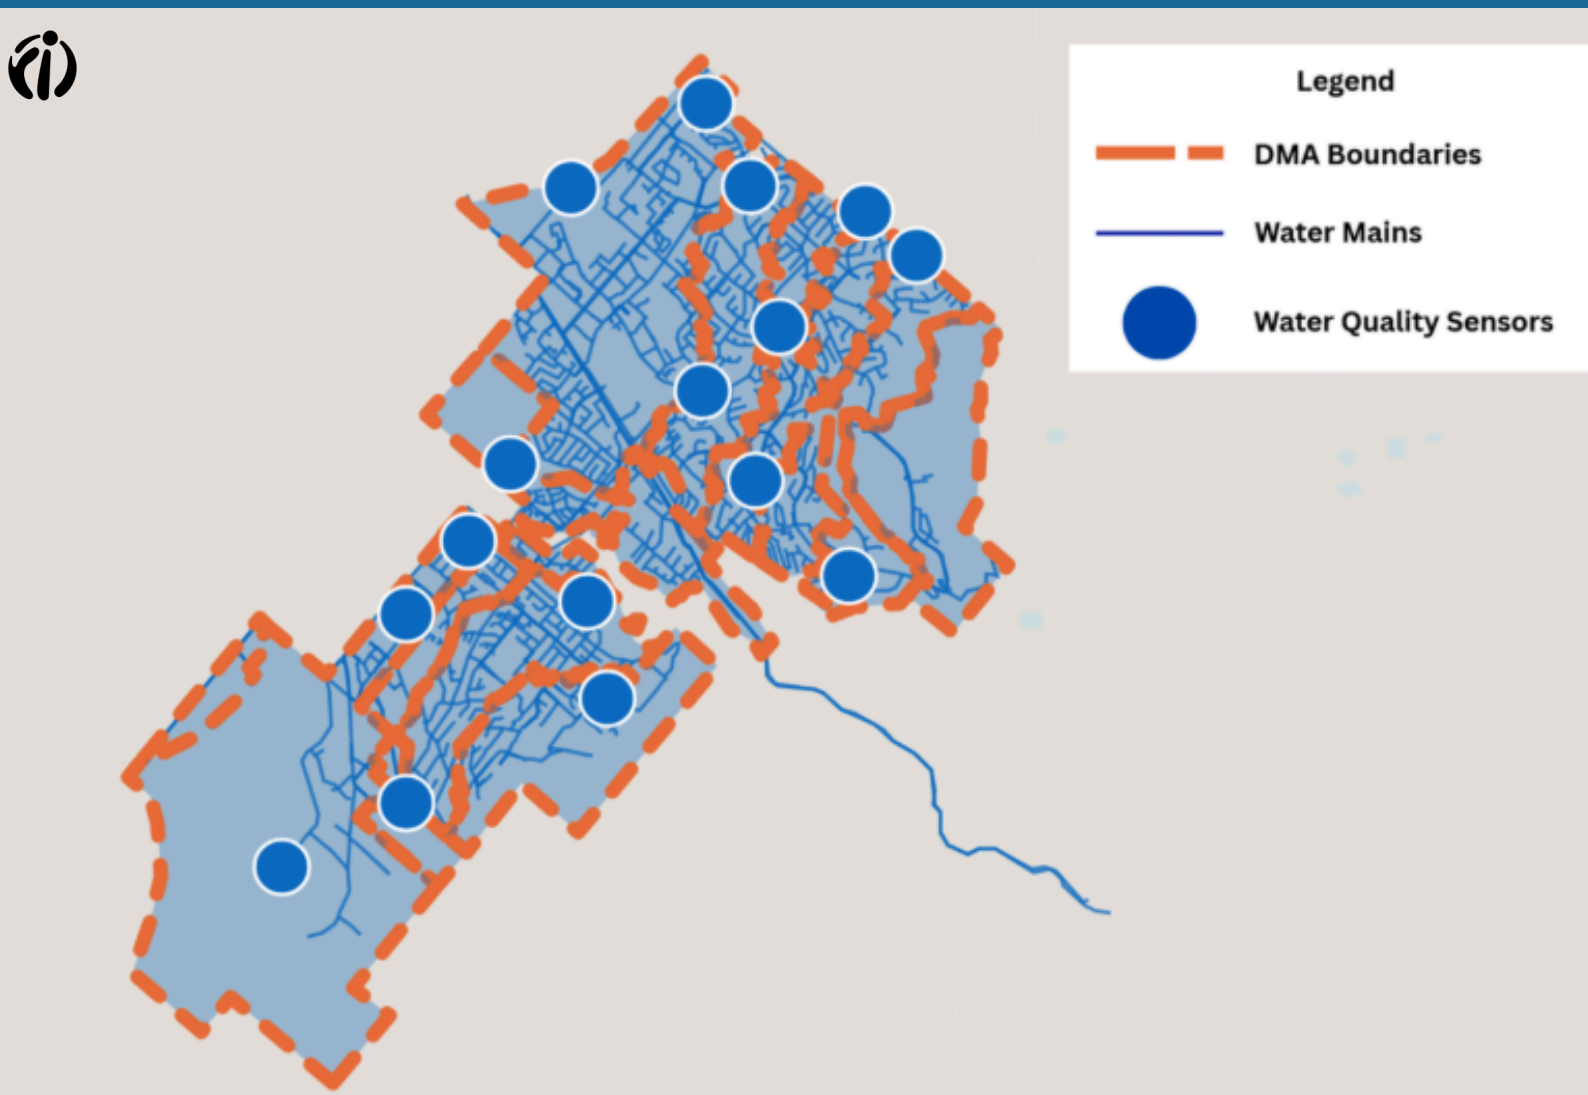

Powered by Infrasync

Before Infrasync

- Water Loss: High + Hidden leaks
- Data Access: Siloed + Incomplete
- Efficiency: Manual + Reactive
- Savings: Uncertain

After Infrasync

- Water Loss: Known Leak Sources
- Data Access: Unified + Actionable
- Efficiency: Automated + Proactive
- Savings: $1M+ Identified/Recovered

"The new sensor network and AI software platform enabled us to see what was happening to water quality in the lake before it hit our treatment plant. Our team could work with confidence about the future outcomes instead of relying on individual experience".

-North Carolina Utility Director
